ABOUT THE ARTIST

Alexandra Paperno (Moscow, Russia, 1978) is a multimedia artist who explores microcosms of detail through her paintings and installations. In painting, Paperno takes on alien perspectives of familiar spaces, such as a simple bedroom layout as seen from the ceiling. In some of her installations, the artist recreates rooms of standard proportions within the allotted space, imbuing the spaces between objects with suggestions of endless possibility. Paperno participated in the Moscow Biennale of Contemporary Art (2011, 2013, 2015) and in the parallel project of the 13th International Architectural Exhibition, Venice (2012).
