ABOUT THE ARTIST

Alexandros Maganiotis' compositions constitute narrations on the borderline between "normal", "paradox" and "ambiguous". The design clarity, the bright, almost transparent colours, the connection between word and picture, as well as the literary references (from Paul Celan and Georgios Seferis), the surreal spirit and the pop aesthetics, the unpredictable meetings and combinations, the game of the logical consequences and the interchanges, of the transformations and disguises, the projection of intimate fears, fantasies and dreams, they all activate a different condition, they introduce an alternative, extremely interesting conception of the world.
